i³**BAR** integrated. interactive. intelligence

Transforming the Way the World Creates Reports

This three-day intensive programme is presented in partnership with the Institute of Business Analytics focuses on the integrated, interactive & intelligent Excel Models for Business Analytics & Reporting (i³BAR) methodology—a structured best practice approach for spreadsheets. Through intensive hands-on, practical exercises, participants will learn to create impressive, powerful and interactive reports for decision-making that are structured, flexible and reliable and requires no additional software, add-ons or licenses. By relying on simple formulae and automation, i³BAR has been proven in practice by practitioners worldwide to reduce the time needed to carry out routine reporting from hours and days down to minutes. Participants who successfully submit and assimilate programme concepts into their working model will receive an i³BAR Certificate of Competency.

Learning Objectives

At the end of the programme, participants will be able to:

- Integrate data from disparate data sources into Excel
- Build reliable and sustainable excel-based reporting models
- Construct interactive models for decision making
- Create scenarios and what-if analysis for planning & decision making
- Produce visually attractive and impactful reports

Course Outline

- DAY 1 Integrate Multiple Data Sources for quick and instantaneous reporting
- DAY 2 Interactive Reports for insightful and impressive presentation
- DAY 3 Intelligent Models for Simulations to answer What-If questions

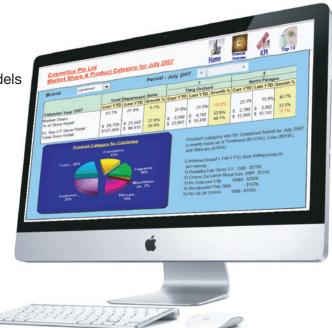

Target Audience

CFOs / Finance Directors / Controllers / Accountants, Sales, Marketing, IT, HR and business leaders. Every person who requires a methodology and structure to build interactive Excel models that will provide speed and accuracy in their Reporting and Analysis work.

Learning Method

Classroom Instructor-led with intensive computer handson exercises of over 50 challenging case studies and tasks to be discussed, thought through and resolved based on one comprehensive real-life case study.

My Chief Development Officer always emphasises "Efficiency is of the upmost importance". One month after attending the i³BAR course, I built a model which epitomises the essentials of work efficiency through a structured i³BAR approach of building sustainable model using simple Excel formula easily maintained by others.

I fell deeply in love with i³BAR, it opened my eyes to speeding up and improving the report preparation process. The i³BAR model is more dynamic than traditional reports and now my users can have relevant information at their fingertips timely and accurately.

I'm really thankful to my CFO, an i³BAR graduate, who recommended this amazing course to me, MIA for organising the course and the i³BAR trainer for sharing her invaluable experience.

CHRISTINE KWAN LAY LING Finance Manager, KVC Industrial Supplies Sdn Bhd, May 2015

Reinforcing the Learning

In addition to the 3-day hands-on training, Institute of Business Analytics (IBA) reinforces success through a comprehensive learning support system.

Active Community of Practice

i³BAR alumni can tap into the network for additional support in Excel modelling. You will also be invited to networking, sharing and learning sessions for continuous personal development.

Post Course Project Work

You can opt to submit a project work after the programme, to build interactive Excel Models that meet your current business needs. You will receive guidance in applying the newly acquired i³BAR concepts into your project work which is to be submitted 4 weeks after the programme.

Certification of Competency ("CoC")

A CoC is awarded to all participants who successfully submit and incorporate i³BAR concepts in building a working model. This internationally recognised certificate is valued by employers as it confirms the participant's ability to solve business reporting needs.

Detailed i³BAR Course Outline

This is a 3-day intensive hands-on Certification programme in 3 modules. There will be pre-learning materials for you to achieve proficiency in utilising 8 commonly used Excel functions. i³BAR emphasises on creative combination of these functions for amazing results—no programming, macros or complicated formulas required.

Module 1: Integrate Multiple Data Sources

- 1. Database Design Do's and Don'ts
- 2. Key components to an integrated model
- 3. Power of the 3-Block concept
- 4. Golden rules to structure sustainable database

Module 2: Build and Present Interactive Reports

- 1. Bad practices that hinder report interactivity
- 2. Simplify reporting process for speed and accuracy
- 3. Secrets to building interactive segmental reports
- 4. Interactive commentaries that auto reflect changes made in data

Module 3: Models to Simulate What-If Scenarios

- 1. Design of input templates incorporating data validation and protection
- 2. Best practices to building planning models
- 3. Simulate varying cost behaviours and trends
- 4. Instantaneous what-if simulations

Top 7 reasons why people recommend i³BAR

1. 90% file size reduction

"I was already using Excel extensively before the course and my biggest file was 30MB. During the course, I was skeptical as everything seemed so simple, but the thinking behind this course is amazing! I was convinced that I can achieve equal if not more powerful results with simple functions. Now that same file is only 3MB, faster, nicer and the management loves it."

David Miller, Head of Business IT

Johnny Teo, Finance Manager

2. 100% data integrity

"We are now regarded as the authority when it comes to numbers."

3. Interactive reporting with drill down capability

"Instead of giving management tonnes of numbers & tables to read previously, the interactive charts and visuals make report reading a joy than a chore. Management is able to obtain prior months/quarters figures with a click of a button, without having to refer back to old copies of management reports." Phyllis Chin, FP&A

Millions of dollars saved

"We had big plans that required a big system, until we attended this course, all these are now made possible. It is no longer just a dream! And it does not cost millions of dollars to invest in sophisticated systems. Besides the knowledge & concepts, we also learned some soft skills around being creative & flexible in our design, and always start with an end in mind. The knowledge gained is definitely very invaluable!" Victor Evans, FD, Healthcare

5. Visually engaging presentation

"My model has created a lot of buzz in the board meetings as they have never seen something like this before."

Claire Richardson, CFO

6. Simplicity!

"It took me about a month to build the ideal model for my company-a fully interactive model by using simple excel functions. The sustainability is amazing as the model can be used in future years with very simple updates required and best of all, I'm having my team update the model easily while I free myself to concentrate on other business critical matters."

Kate Davis, Management Accountant

7. Dedicated Course Trainers

"The course is fast-paced and all my classmates seem to be well-versed in Excel but I did not face any peer pressure. Elaine & team are truly dedicated; rarely do I come across trainers that are so passionate and willing to help an individual. Their vast experience and sharing during class made it easy for me to relate to work and helped my understanding."

Kelly Yu, Treasury

The Institute of Business Analytics (IBA) comprises an international team of highly qualified professionals from diverse industries who train and consult organisations in transforming the way the world creates reports. The team brings extensive management experience from the financial, commercial, education, government, military and non-profit sectors. Our collective experience is extensive and has encompassed auditing, financial analysis, management reporting and enterprise system implementation.

The team is a group of passionate professionals who share in the same belief in using technology to create better work life balance. IBA trainers apply Adult Learning Methodology to inspire participants worldwide to make dramatic improvements that optimise their performance in the workplace.

Elaine Chong is an international speaker, public and corporate trainer on business analytics and best practice reporting using Excel. She is also the developer and master trainer of the world renowned courses like i³BAR and Visual Analytics now offered in 11 countries.

Elaine has extensive experience in auditing, financial analysis, management reporting and enterprise systems implementation. She has achieved several global awards for management reporting accuracy, timeliness and presentation. Her passion for this topic has inspired many of her students to make dramatic improvements that optimise their performance in the workplace.

May Wong's work experience spans over 17 years with extensive experience in implementation systems and designs in accounting, reporting and consolidation as well as data migration. She has worked for various multi-national companies, including extensive overseas exposures.

She is currently a Member of the Malaysian Institute of Accountants (MIA), a Fellow member of the Chartered Association of Certified Accountants (ACCA) and provisional member of Institute of Singapore Chartered Accountants (ISCA).
